

## FAA Make/Model Directory for SLSA - June 19, 2015

This document provides a listing of all special category light-sport aircraft (SLSA) make/model combinations that have received, or may be eligible to receive, SLSA airworthiness certification. If a make/model combination does not appear on this list, AIR-100 must be contacted prior to issuing the first airworthiness certificate. FAA Order 8130.2H, paragraph 435.a.(3) states in part "AIR-100 must be contacted before issuing the first airworthiness certificate to any new manufacturer's LSA or to a new LSA model from existing manufacturer. **Send notification of a new make/model to robert.franklin@faa.gov.**

DARs cannot issue the first special LSA category airworthiness certificate for any new manufacturer's LSA or to a new model from existing manufacturers. Only an assigned ASI can perform the first issuance.

The information in this directory is based mainly on a search of the FAA Registry and is considered current as of the revision date identified on the document. Review of the FAA Registry for update of this information will be performed approximately every six months. New make/model combinations will be added after the issuance of the first airworthiness certificate for that make/model. Other updates will be made when deemed appropriate.

Contact Terry Chasteen, ACE-114 with any questions or comments in regard to this listing or for any corrections that need to be made: Call 816-329-4147 or submit an e-mail to 9-AIR-ACC@FAA.gov or SAD-LSA-SAFETY@faa.gov.

No.	Make	Model / Series	Engine Options (if applicable)	Propeller Options (if applicable)	Wing/Canopy Options (if applicable)	No Longer Produced	Type	Manufacturer
		Aircraft manufacturer's designation for an aircraft grouping with similar design or style of structure. Name on FAA registry may be same or similar name. Includes model variants (e.g., "Series") and market names, as applicable. See NOTE 1 at end of listing.	Engine installation options for this make/model. Refer to the AOI/POH for specific approval. (Not applicable for make/model no longer produced; if shown - for historical purposes only)	Propeller (Mfr) installation options for this make/model. Refer to the AOI/POH for specific approval. (Not applicable for make/model no longer produced; if shown - for historical purposes only)	Wing / canopy options for this make/model. Refer to the AOI/POH for specific approval. (Applicable only to weight-shift-control (trikes) and powered parachutes)	See NOTE 2 at end of listing.	Abbreviation for class of aircraft. See NOTE 3 at end of listing.	The FAA considers an SLSA manufacturer to be a person who not only can attest to meeting the provisions of 14 CFR 21.190, but who can demonstrate these abilities to the satisfaction of the FAA. A person who cannot demonstrate these abilities, or complete the manufacturer's Statement of Compliance would not be considered a manufacturer.

<p><b>NOTE 1:</b> For purposes of this directory this column may indicate the "Model" designation and/or a variant designation (e.g., "Series") as determined by the manufacturer [Ref. ASTM F2626 &amp; F2930]. A variant designation may be used in this directory to differentiate the engine and propeller options available to that specific variant from other variants of the "Model." [Ref. CAST/CAO Common Taxonomy Team (CICTT) document on International Standard for Aircraft Make, Model, and Series Groupings]</p> <p>Use of a "Series" designation in this directory does not constitute a new "Model" designation for the purposes of determination of first make/model airworthiness certification (for which AIR-100 must be contacted and where only a DAR, may perform the airworthiness certification). A new "Series" may be added to this table without being considered a new "Model." Any policy/guidance issues on "Model" designation as related to airworthiness certification should be referred to AIR-100 for determination of proper action.</p>								
<p><b>NOTE 2:</b> An "X" in the "No Longer Produced" column indicates that this make/model combination is no longer being produced for the US market. If an aircraft of this make/model combination is presented for airworthiness certification should be referred to AIR-100 for determination of proper action.</p>								
<p><b>NOTE 3:</b> FW = fixed wing airplane; FA = fixed wing amphibian; GL = glider/motorglider; PP = powered parachute; WS = weight-shift-control; LTA = lighter-than-air</p>
